RESEARCH & PROFESSIONAL DEVELOPMENT

Rethinking Attention Sinks in Qwen3-1.7B | *Independent research | Feb–Sep 2026 | 4 hours/week × 36 weeks*

- Investigated why certain attention heads in a transformer language model assign unusually high attention to the initial token.
- Used grouped-query attention as a natural experiment; findings indicate that the query pathway is a causal contributor to sink behaviour.

Echo Chambers in Recommender Systems | *STEM Club research | Apr 2026–present*

- Research mentor for a simulation-based investigation of whether recommender algorithms narrow users' content exposure.
- Helped the team identify bugs behind misleading early results and redesign the simulation so it could test for a genuine effect; the team is applying for the CREST Silver Award.

Storage Temperature and Microbial Growth in Melons | *Team research | 2023–2024 | 2 hours/week × 24 weeks*

- Compared microbial growth across three melon varieties stored at four temperatures.
- Contributed to the project awarded Gold in the Cambridge Upper Secondary Science Competition 2023–2024.
